

# QA Protect

## Independent Ultrasound Physics Quality Assurance Service.

In accordance with IPEM Report 102, Quality Assurance of Ultrasound Imaging Systems.

### Key Features:

- Annual inspection of ultrasound system
- Detailed inspection and test of each ultrasound probe;
  - Drop out tests, including phased arrays
  - Sensitivity/penetration
  - Vertical/lateral distance
  - Horizontal distance
  - Axial resolution
  - Grey scale/cyst
  - Beam/slice thickness
  - Noise
- Review of User QA records
- Comprehensive report for each ultrasound system and probes.

### Benefits:

- Independent review of user QA records
- Independent review of maintenance providers activity
- Early detection of defects
- Reduced risk to patients
- Access to Multi-Medix's scientific and technical teams
- Priority access to Multi-Medix's advanced probe testing and probe loan pool.
